

Interviews with stakeholders (by parents) about
The development of the educational programme
of the dual training programme

**Are you familiar with the terms of the three
-way dual education agreement signed by your child?**

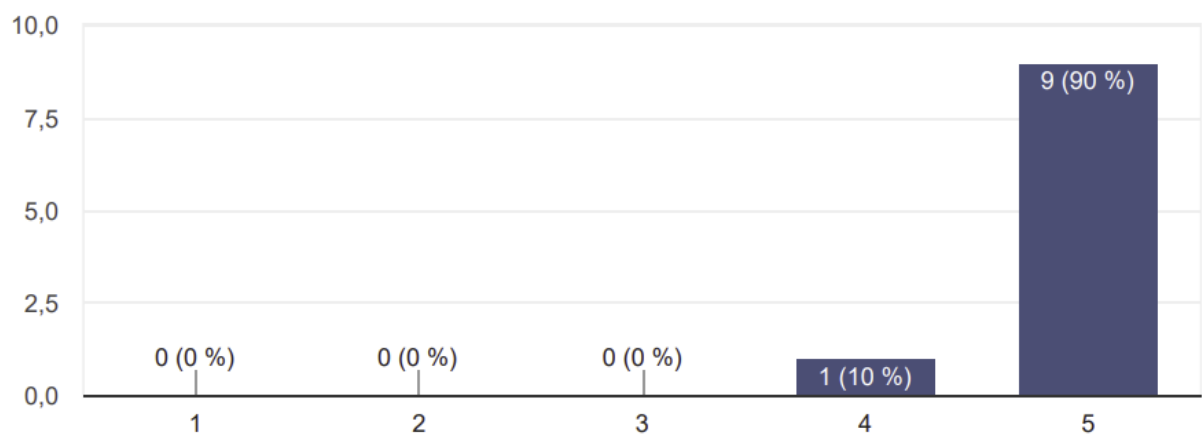

I know

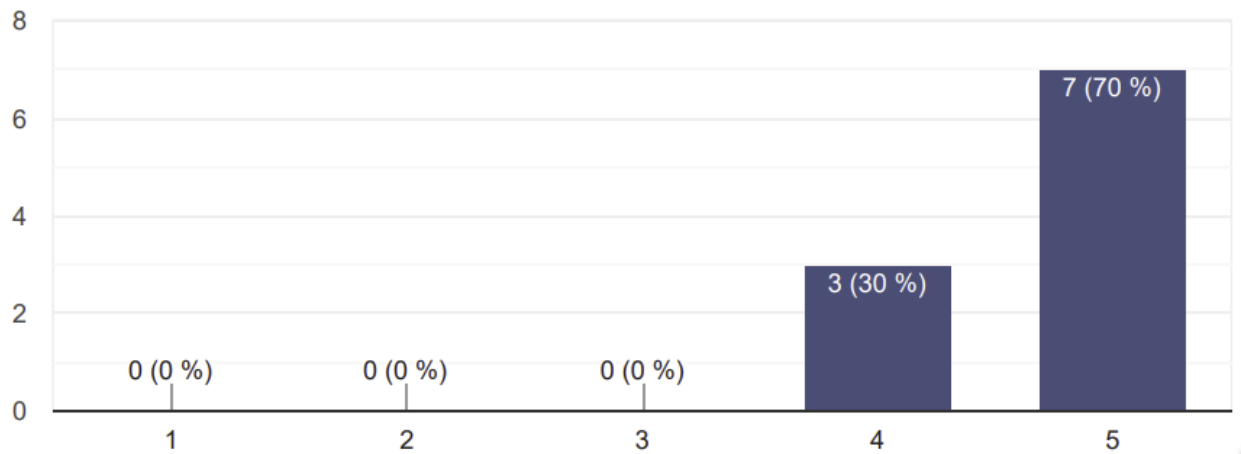

**I know that the contract has been signed,
but I haven't read it**

I don't know about the contract

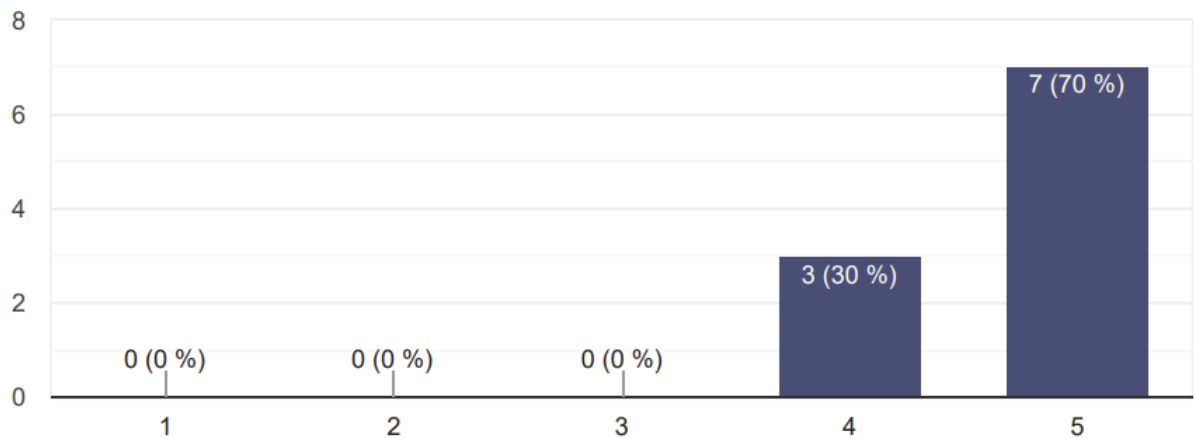

Evaluate the level of organization of the educational process

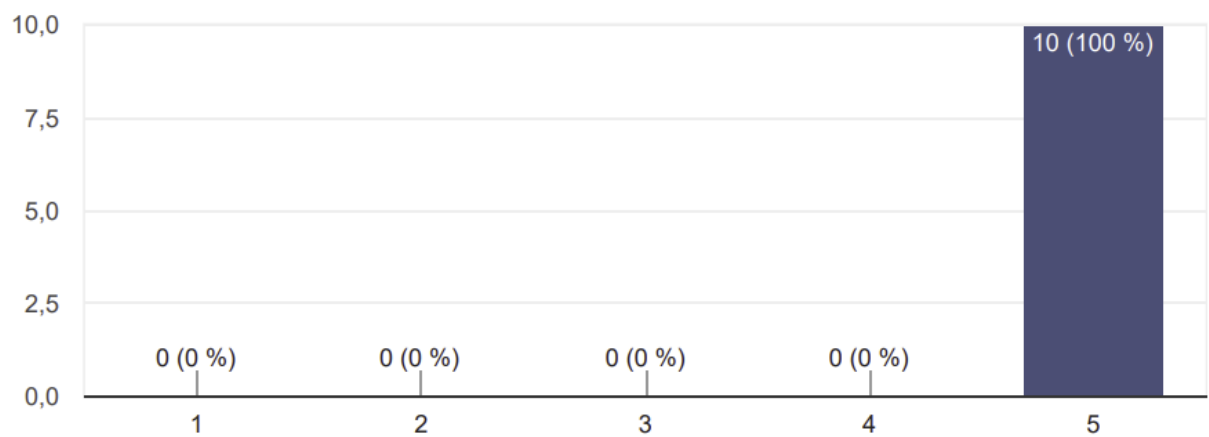

**Evaluate the completeness of teaching materials for
your program in an electronic environment (in your personal account,
on the University portal): curriculum, annotations to
work programs, internship programs, etc.**

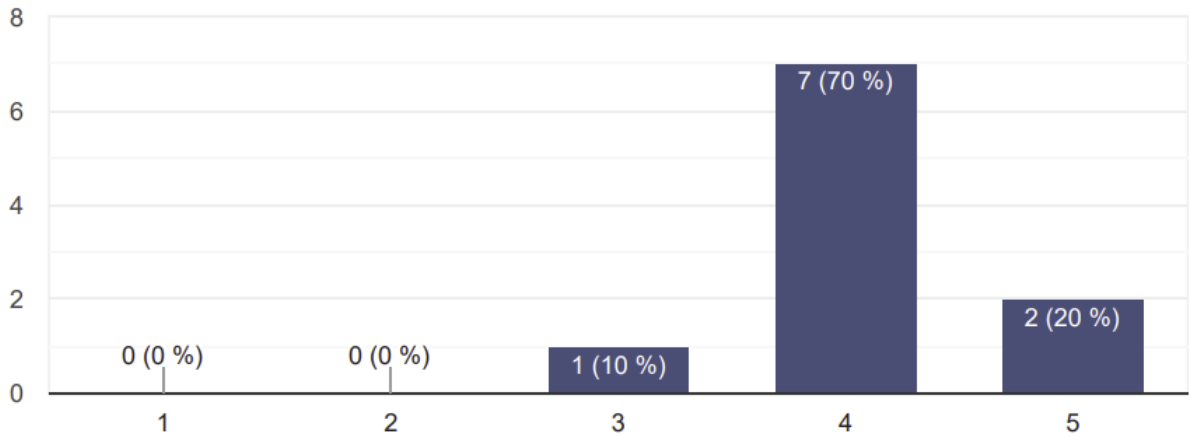

Evaluate the effectiveness of feedback (via email, telephone, individual consultations at the department, etc.) when contacting teachers outside of classes

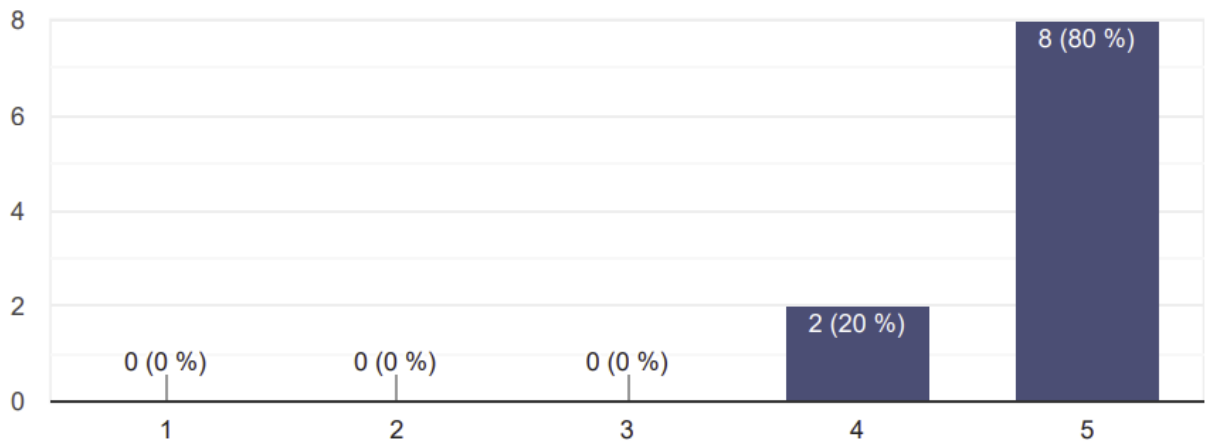

Evaluate the quality of the industrial training base (school)

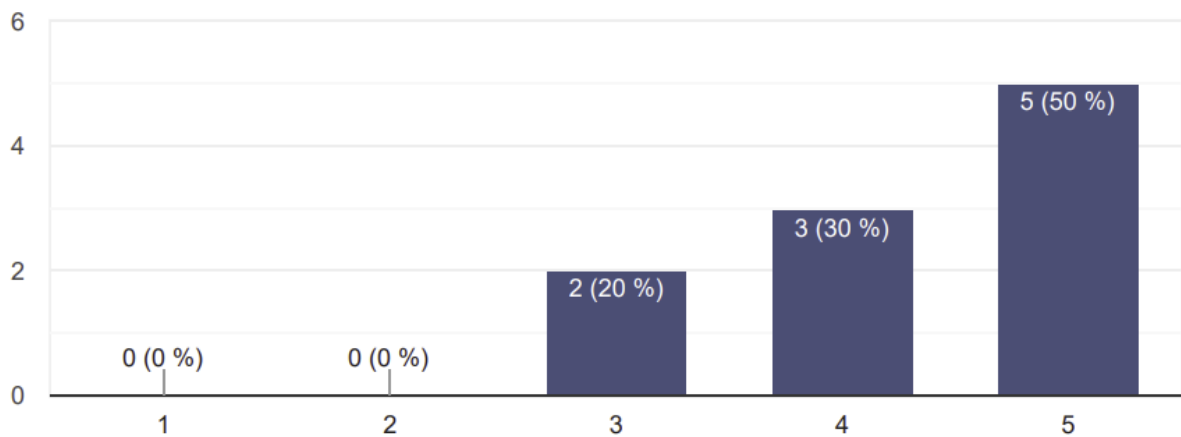

Evaluate the quality of classrooms where classes are held (university)

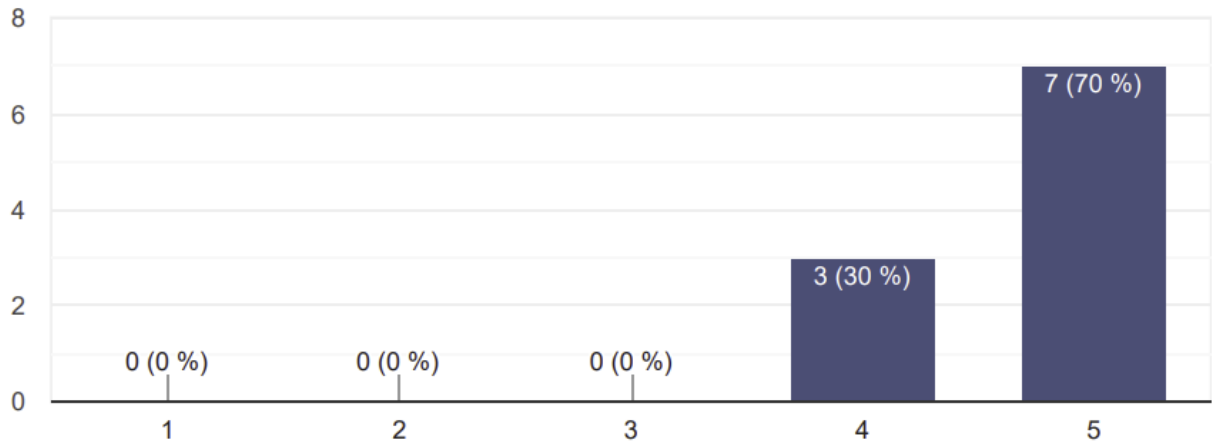

Evaluate the quality and efficiency of the work of your adviser, the dean's office staff when contacting them, and the timeliness of receiving information about the academic and extracurricular process

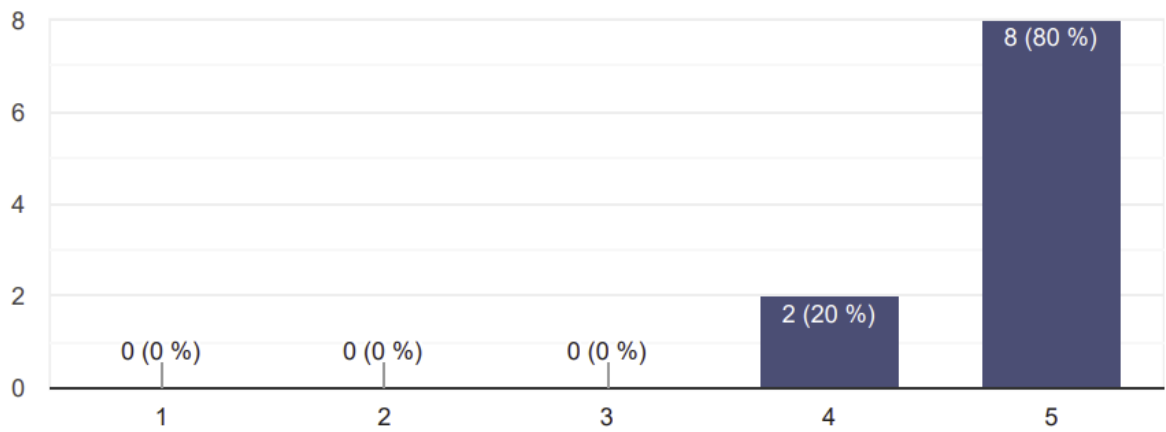

Evaluate the possibility of implementing an individual learning path (the possibility of studying according to an individual plan, choosing disciplines, topics of work and projects, etc.)

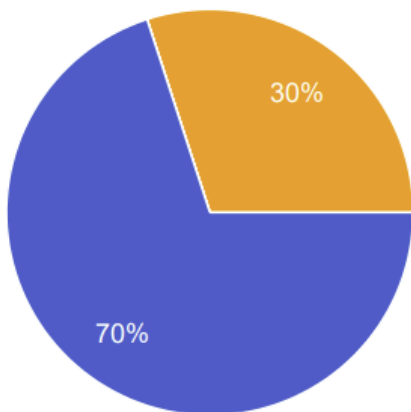

How satisfied are you with your child's education program in general?

Evaluate the quality and efficiency of the work of mentors and curators of the partner school when contacting them

Would you like your child to be employed at an NGS partner school after graduation?

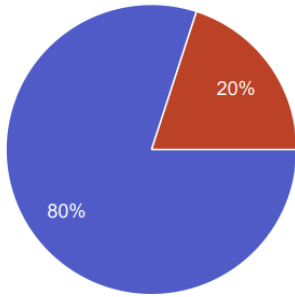

Yes

No

Undecided

What part of university classes did your child miss?

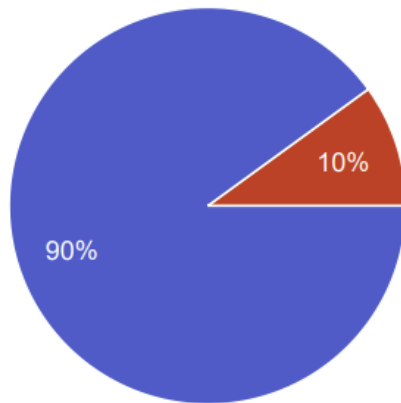

never

missed up to 10% of classes

missed up to 25% of classes

missed up to 50% of classes

What part of your child's industrial training at school did you miss?

never

missed up to 10% of classes

missed up to 25% of classes

missed up to 50% of classes

You can comment on any question from the questionnaire or formulate your suggestions for improving the quality of the educational process

I'm fine with that

Thank you so far, everything is fine, I would like to have more practice for students.

It is good that the training is conducted jointly with the school! The material conditions provided by the school are still better than at the university! We offer to take even more classes to school!

The university's material and technical base and audience availability should be improved
